TEKRA ANNOUNCES NEW DURA-GO™ FR65 POLYCARBONATE FOR HP INDIGO PRINTERS

New Berlin WI - [Tekra Corporation](#) has announced the addition of a 10 mil FR65 Lexan™ to its [Dura-Go™ line of printable films](#) for HP Indigo printers. The new product is called [I05A10](#) and is stocked in 12"x18" sheets

The Dura-Go Lexan FR65 polycarbonate is a clear film with a velvet/matte finish and is coated on one side. It offers the electronics and electrical industries a HP Indigo printable film that has the right balance of flame retardant, electrical and thermal properties without secondary operations. It can be easily embossed, die cut, folded, and bended.

"FR65 is the most commonly used polycarbonate in the electronics industry, and since more and more applications are moving digital, it was important to have a Dura-Go version coated and stocked on our warehouse floor, ready to ship to our customers," stated John Steinke, Market Development Manager. "With our relationship with SABIC Innovative Plastics, we can also quickly coat and convert other Lexan FR films if needed."

Typical applications include name plates, face plates, and labels where UL94 V-0 listing is required. For more information on this new product for digital printing or for [free test samples](#), please contact Tekra Corporation at (800) 448-3572 or visit our website at www.tekra.com.

Tekra Corporation has provided plastic film and adhesive solutions to the printing industry for over 30 years and to the digital films industry for over 10 years. Tekra offers proprietary coating technologies, converting services, and, through special supplier relationships, a full line of plastic substrates. Tekra is the North American authorized distributor and exclusive distributor to the North American medical diagnostic market for Dupont Teijin Films™, the authorized distributor for the polycarbonate film products of SABIC Innovative Plastics in the United States and Canada, and an Authorized Converter and Distributor for 3M adhesives.
